

ABSOLUTE OPTIMUM RELIABILITY.

All the reasons why you should
only buy MAN Genuine Parts.

IF IT DOESN'T SAY MAN, IT ISN'T THE REAL DEAL.

Your MAN vehicle is a valuable business asset. Off the road, it's costing you money, so it surely makes sense to keep it in the best possible condition.

That's why we recommend you always use MAN Genuine Parts, every one of which is manufactured in accordance with our strict guidelines to work perfectly with your MAN vehicle. Unlike replica parts – which may save you money in the short term – they guarantee you maximum reliability, durability, safety and economy.

If in doubt, look for the MAN item number which is only awarded to MAN Genuine Parts once they have successfully completed an exhaustive series of quality and endurance tests.

Our parts come from our UK distribution centre and over 97% are available from our European Logistics Centre. All come with a free 24-month fitted warranty that is valid worldwide.

MAN GENUINE PARTS AND MAN SERVICE – STRONGER TOGETHER.

Combine MAN Genuine Parts with MAN Service and you'll find no better way to ensure your vehicle is completely roadworthy.

Around the UK we have 195 trained Parts Technicians, all of whom are focused 100% on offering you the very best customer service.

"Using MAN Genuine Parts keeps your vehicle in perfect condition and safeguards your investment."

ABSOLUTE STOPPING. ABSOLUTE CONTROL.

Whether you're transporting 10 tons of gravel or three dozen boxes of fresh flowers, you need to know that when you hit the brakes, you're going to slow down, safely and under complete control. That's why you should always fit MAN Genuine brake components.

Together with a group of certified OEM manufacturers, we've tested our brake discs and brake linings against a range of 'bargain' brake components from other manufacturers. The results are telling and one thing is very clear – low price means low quality. So here are a few points to remember when you're out shopping for some new brakes.

With MAN Genuine brake components:

- Your drivers will be safe
- Your vehicle will require servicing less often
- You'll get constant brake output over the entire service life and in all operating situations.
- You'll enjoy a much longer service life and get more from your investment
- With MAN Genuine brake components, you'll save in the long term.

Every time you take your vehicle off the road for a visit to the workshop, it's costing you money. So, doesn't it make sense to do it as little as possible?

That's where MAN Genuine Parts kits come in. Obviously, buying a complete kit is going to be more than expensive than a single part, but buying the parts separately would cost you even more. And once you've got your vehicle to the dealership, doesn't taking the opportunity to replace all the peripheral parts – and not just one – seem like a smart move?

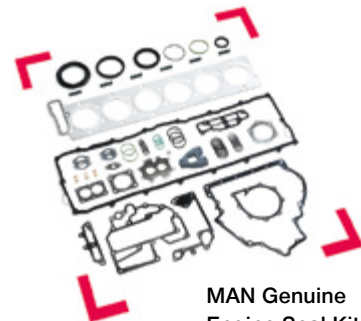

Our portfolio of MAN Genuine Parts kits currently includes 10 component groups, that make up a total package.

MAN Genuine
Cylinder Head Kit.

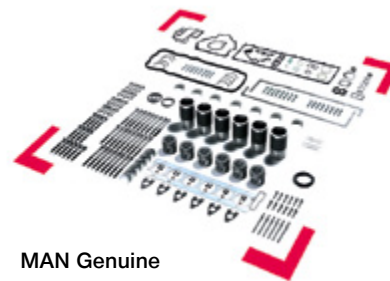

MAN Genuine

COOLING FAN, WATER PUMP & ANTI-FREEZE.

GOLDSLOCKS WOULD APPROVE.

The engine in your MAN always needs to be at the optimum temperature – not too hot, not too cold, and certainly not with a frozen cooling system. With MAN Genuine parts you can be sure your engine is always operating perfectly.

We put our MAN Genuine cooling fans and water pumps through a battery of tests to ensure they offer the endurance and performance required.

Our first-class quality anti-corrosion and anti-freeze liquid offers you:

- 100% compliance with the MAN standard, resulting in improved protection, and highest reliability
- Protection of metals and alloys in cooling circuits, including aluminium, cast iron, steel and brass
- Compatibility with all MAN engines of all emission levels.

ABSOLUTE INDIVIDUALITY.

Put your stamp of individuality on your MAN truck or van with one or more of our accessories.
