Camera & Alert Systems

Note to Dealers; The calibration kit U1.28210-6019 is required for the installation of MAN 360 Camera

MAN 360° BirdView

- Four HD cameras with wide-angle lenses
- Images displayed on 7" monitor
- 1,280 x 720 px camera resolution
- Optimal view behind, to the sides, or in front of the vehicle
- High-resolution HD camera recordings provide a clear image on the monitor in comparison to analogue camera systems
- ADR compliant
- Suitable for TG vehicles max length 14m, maximum vehicle width 2,6m
- 2 years warranty
- Optional video recorder:
 - SD memory card: 128GB
 - Recording time: 54 hours
 - Power supply: 24 V

The views adjust automatically while driving:

Speed dependent:

- With a speed <15 km/h in detail, for precise manoeuvring.
- With a speed from 15 km/h up to 40 km/h with most possible surround view.
- With a speed >40 km/h the monitor goes off.

Situational:

- When using the indicator, the vehicle image moves to the respective top corner and gives a free view to the maximum side and rear area.
- When engaging the reverse gear the display is split and shows in the top third part a 2D image of the rear view

Wheel Nut Indicator – Retorque System

Suitable for
NEW TG

<https://www.retorquesystem.com/>

Retorque System’s patented indicators use colour to highlight wheels that have recently been removed and require retorquing. The indicators need to be set to red after a wheel change and back to green following a retorque.
