Cameras & Alert Systems

Quick guide to select the right TG3 camera configuration

1

Identify the vehicle type (Artic /Rigid) and cab type (Sleeper /Day)

2

Check the vehicle build for following specification

- 1- camera prep : sales codes 0P2D0 / 0P2D1 or
- 2 -camera prep: sales codes 0P2D2 / 0P2D3
- 12" MMT - Sales code 0P2LZ
- MAN Turn Assist Sales code 0P5DI OR 0P4FE

3

Select the required camera accessory code

- E.g. DVS /FORS to display via MMT or 7" screen

4

If you have selected a camera system for MMT, include the relevant switch box accessory code(s)

- Represents the programming required to trigger the MMT/Camera system

5

If required, include the option for Turn Left Alarm on/off switch

- Not mandatory for London DVS. Recommended for vehicles entering European continent

- Tyre Sensors are fitted to the wheel or valve stem
- Data is sent via a control box to DTM TyreWatch Cloud, made visible in an application for the user and its key service agents.
- Auto alerts for maintenance and actions to key nominated personnel (including dealerships) All red alerts are warned to the driver in-cab by red LED
- Real time tyre monitoring, tyre pressure and temperature analysis
- Supports pro-active maintenance e.g. preparation for PMI
- Improves driver, and road user safety and reduces operating costs

Roof racks TGE

The basic carrier is the ideal basis for roof structures such as ladder holders and high brackets.

For transport of ladders or other long items (timber, pipes etc.), an optional painted ladder rack can be installed on the platform loading surface, which also offers front wall protection.

- Maximum load [kg]:20
- Carrier cross-section [mm]: 30 x 20
- Length [mm] 460, Outer width [mm]: 720
- Scope of supply: 1 unit

For transporting two simple ladders or one folding, trestle or sliding ladder. Only available in combination with the basic carrier.

The set of angle brackets is ideally suited for safely and securely transporting long objects. The high brackets can be used to securely clamp wooden boards to the roof bars or the luggage rack.

Wheel Nut Indicator – Retorque System 

Fitted price

<https://www.retorquesystem.com/>

Retourque System’s patented indicators use colour to highlight wheels that have recently been removed and require retorquing. The indicators need to be set to red after a wheel change and back to green following a retorque.
