31st March

IF IT DOESN'T SAY MAN, IT ISN'T THE REAL DEAL.

Your MAN vehicle is a valuable business asset. Off the road, it's costing you money, so it surely makes sense to keep it in the best possible condition.

That's why we recommend you always use MAN Genuine Parts, every one of which is manufactured in accordance with our strict guidelines to work perfectly with your MAN vehicle.

Unlike replica parts – which may save you money in the short term – they guarantee you maximum reliability, durability, safety and economy.

If in doubt, look for the MAN item number which is only awarded to MAN Genuine Parts once they have successfully completed an exhaustive series of quality and endurance tests.

Our parts come from our UK distribution centre and over 97% are available from our European Logistics Centre. All come with a free 24-month fitted warranty that is valid worldwide.

MAN GENUINE PARTS AND MAN SERVICE – STRONGER TOGETHER.

Combine MAN Genuine Parts with MAN Service and you'll find no better way to ensure your vehicle is completely roadworthy.

Around the UK we have 195 trained Parts Technicians, all of whom are focused 100% on offering you the very best customer service.

“Using MAN Genuine Parts keeps your vehicle in perfect condition and safeguards your investment.”

THE FINE ART OF FILTRATION.

Unfortunately, there are impurities in everything you need to run your MAN vehicle – in the fuel, the oil and the AdBlue. Even the air in your cab requires attention from time to time.

However, by fitting MAN Genuine filters, you'll not only be keeping all those harmful impurities to a minimum, you'll also be enhancing the performance of your vehicle and prolonging its life. Here are a few things you'll only find with the real deal:

PERFORMANCE

MAN Genuine filters have sufficient dirt pick-up capacity to capture harmful particles throughout the entire service interval, unlike replicas which frequently become clogged and regularly need changing.

PLEAT GEOMETRY

Only MAN Genuine filters have the correct amount of pleats, surface area and properties to handle the extended service intervals of your MAN vehicle.

DESIGN

MAN Genuine filters can also be securely mounted and sealed to maximise performance, unlike replicas which aren't manufactured to the correct dimensions or shape.

ACCURACY OF FIT

MAN Genuine filters are designed to accurately fit the exact dimensions of the filter vessel. If a replica filter doesn't fit properly or is made from inferior materials, it's going to leak, and harmful particles are likely to get in and cause damage.

ONLY CLEAN OIL IS GOOD FOR YOUR MAN

Engine oil has a lot to do. Not only does it lubricate the moving parts within the engine – thus preventing wear – it also helps dissipate heat, protects against corrosion, and acts as a cleaner.

It's therefore vital to ensure that particles of metal, dust or combustion residue are filtered out before they can hamper the oil's performance and reduce the life of your engine.

GET OFF TO THE BEST START.

As you know, combustion engines don't just start on their own; they need a self-starting starter motor. However, what you may not know is that in addition to our extensive selection of new parts, we also offer **MAN Genuine Ecoline starter motors**. If you have an older vehicle, **they're an inexpensive alternative.**

We favour a workshop repair process when re-manufacturing MAN Genuine Ecoline starter motors and the process is subject to the same quality requirements and series standards as the production of new parts.

THE STARTER MOTORS TO TRUST

Every MAN Genuine starter motor is packed with power, reliability and the promise of a long service life.

They're protected against salt spray, humidity, dust, vibrations, high and low temperatures, and aggressive fluids to ensure you always get off to a dependable start.

MORE CHARGE, LESS CHARGE.

Our Ecoline range also includes alternators. Given the ever-increasing level of electrical equipment in modern commercial vehicles, an efficient, reliable and high-performing alternator is an absolute essential. However, it doesn't have to be expensive.

Like all Ecoline products, MAN Ecoline alternators are subject to the same rigorous testing we apply to our new replacement parts. And like our starter motors, they are protected against salt spray, humidity, dust, vibration, high and low temperatures, and aggressive fluids.

OILS LIKE NO OTHER.

HIGH-PERFORMANCE OIL FOR HIGH-PERFORMANCE ENGINES.

Modern engines have many boxes to tick. They have to offer top performance, flawless efficiency, and low, low emissions. And they have to do it at all times, even under extreme climatic conditions.

For MAN trucks, buses and vans, that means using MAN Genuine oil. It's produced by certified suppliers in accordance with our own stringent specifications – they're higher than anyone else's – and carefully inspected regularly to ensure it's up to standard.

MAN GENUINE OILS...

- Are subject to continuous external and internal quality inspections
- Offer you top performance and efficiency with minimal oil consumption
- Are tested on paper, in the laboratory and out on the road
- Are 100% approved for use with your MAN
- Can result in fuel savings and reduced CO₂ emissions, helping to reduce your total cost of ownership (TCO).

FREE MAN twill cap when you purchase a barrel of MAN Genuine oil.
(Worth £20)
